Service	Details				
LU00834	<p>LU00834 M.C.S. ENTRIES = ++PTF (LU00834)</p> <p>SMFEWMT WRITING OF SMF RECORDS USES A SHARED WORKAREA</p> <p>PROBLEM DESCRIPTION:</p> <p>When CA SYSVIEW writes any of its records to IBM SMF it is using a shared workarea on the IBM SMFEWMT macro call. Dependent on timing this could theoretically present an unknown problem if multiple tasks were writing records at the same time.</p> <p>This does not affect the writing of SYSVIEW records to a log stream, only to SMF.</p> <p>SYMPTOMS:</p> <p>No known problems/symptoms have been identified as a result of this. At this time it is being addressed as a proactive measure.</p> <p>IMPACT:</p> <p>Unknown.</p> <p>CIRCUMVENTION:</p> <p>None.</p> <p>PRODUCT(S) AFFECTED:</p> <table> <tr> <td>CA SYSVIEW PERFORMANCE MANAGEMENT</td><td>Version 15.0</td></tr> <tr> <td>CA SYSVIEW PERFORMANCE MANAGEMENT</td><td>Version 16.0</td></tr> </table> <p>Related Problem:</p> <p>SYSVW 13297</p> <p>Copyright (C) 2021 CA. Service	Details				
LU00926	<p>LU00926 M.C.S. ENTRIES = ++PTF (LU00926)</p> <p>SPAWNED REXX SESSIONS EXECUTING UNDER WRONG PROFILE</p> <p>PROBLEM DESCRIPTION:</p> <p>The RXDISP command is used to run a REXX exec. This command will spawn a separate SYSVIEW session to execute the REXX.</p> <p>The spawned REXX session should execute under the same profile as the original SYSVIEW session. Depending on how the RXDISP command was executed, the profile being used may or may not be the user's profile. For example, commands executed via the SYSVIEW capture or XDI interface execute under a specific profile for the respective interface.</p> <p>Currently, not all spawned REXX sessions execute under the correct profile. This fix is to correct this behavior and ensure that all REXX sessions spawned by SYSVIEW execute under the correct profile.</p> <p>SYMPTOMS:</p> <p>REXX sessions spawned by SYSVIEW execute under a different profile than the original SYSVIEW session.</p> <p>IMPACT:</p> <p>REXX sessions that get spawned by SYSVIEW may execute under a different profile than expected.</p> <p>CIRCUMVENTION:</p> <p>None.</p> <p>PRODUCT(S) AFFECTED:</p> <table> <tr> <td>CA SYSVIEW PERFORMANCE MANAGEMENT</td><td>Version 15.0</td></tr> <tr> <td>CA SYSVIEW PERFORMANCE MANAGEMENT</td><td>Version 16.0</td></tr> </table> <p>Related Problem:</p> <p>SYSVW 13429</p> <p>Copyright (C) 2021 CA.
