+----------+----------------------------------------------------------+
*************************
* STEPS   TO   PERFORM *
*************************
1. Tailor and submit CAI.CE0CJCL(BQ4JJTAR) to restore the
CE0CDATA(D2ETAR) TAR backup file delivered by this PTF.
```

Service	Details
	IMPORTANT: All of the USS directories and files that comprise the CA Spool Java Transformers are replaced by this process. If you have customized any files without changing the names of those files from the original names, save them to a separate directory before running the BQ4JJTAR job. Then copy the customized files back to the target directory after BQ4JJTAR is executed. Customization will be lost if steps are not taken to preserve files that have been changed since the initial install. In most cases, customized files would be parameter files stored in the /tpv/CAI/caspoold2e/xenos/apps directory. 2. Update CAIQENVA member in CAI.CE0CPARM to use the latest Java Transformers engine build delivered by this PTF.).

ADD SUPPORT FOR OUTPUT TRANSFORMATION DESIGNER V20.4
PROBLEM DESCRIPTION:
In order to take advantage of the latest functionality available
for data transformation, the Output Transformation Designer
delivered by the CA Spool Java Transformers is upgraded to the
latest release of software from OpenText, from V16.5.nn to V20.4.nn.
SYMPTOMS:
None.
IMPACT:
CA Spool Java Transformer customers using the Output Transformation
Designer are upgraded to the current vendor release.
CIRCUMVENTION:
None.
PRODUCT(S) AFFECTED:
CA SPOOL JAVA TRANSFORMERS                                Version 14.0
Related Problem:
