| LU00694 | <p>LU00694 M.C.S. ENTRIES = ++PTF (LU00694)</p> <p>POSSIBLE STOP TRACKING OF JOBS</p> <p>PROBLEM DESCRIPTION:</p> <p>It is possible that jobs may stop tracking and this can leave jobs in the ACTQ even though they have completed in JES. The problem is that processing by CA-7 of the COMMDS stops. The problem is very timing dependent and does not usually occur. The problem may be seen if the /AGENT,FUNC=PING command is repeatedly issued and times out because CA 7 cannot connect to the agent. This fix can recognize if this condition occurs. It will cause CA-7 to internally reset within minutes so that the processing of the COMMDS will resume. Modules SASSCHDX, SASSCMGR, and SASSNUC are part of the composite UCC7 LKED.</p> <p>SYMPTOMS:</p> <p>Jobs stay in the ACTQ.</p> <p>IMPACT:</p> <p>Medium.</p> <p>CIRCUMVENTION:</p> <p>None.</p> <p>PRODUCT(S) AFFECTED:</p> <p>CA Workload Automation SE <span style="float: right;">Release 12.0</span></p> <p>Related Problem:</p> <p>7 4040</p> <p>Copyright (C) 2021 CA.
