LU00943	LU00943 M.C.S. ENTRIES = ++PTF (LU00943) ENABLING DIFFERENT DB2 TABLE SPACES FOR REPORT SERVER ENHANCEMENT DESCRIPTION: Currently Report Server initialization parameter RServerDbCreateTableSuffix limits user to specify only one database and table space for both job and application history tables. This enhancement introduces support for different DB2 table spaces that might be specified for application and job history Report Server tables. This is accomplished by two new parameters in RSERENV: - RServerDbCreateAHRTableSpace - RServerDbCreateJHRTTableSpace Those parameters are mutually exclusive with RServerDbCreateTableSuffix. Example: RServerDbCreateAHRTableSpace=IN ESPDB.ESPAHRTS RServerDbCreateJHRTTableSpace=IN ESPDB.ESPJHRTS Note: Database and tablespaces must be created in advance. If parameters are not coded, the tables are created in the default database and tablespace. The Report Server appends the appropriate clause, "IN dbname.tsname" onto the end of each CREATE TABLE statement it issues on its initial startup. 	initialization parameters specify the database name and tablespace name in which to create the application and job history tables. The names you specify are added to the CREATE TABLE statements that are automatically issued when you start the Report Server for the first time. - If you code RServerDbCreateTableSuffix or RServerDbCreateAHRTTableSpace and RServerDbCreateJHRTTableSpace, you must also create the database and tablespace(s) specified. - If you do not code RServerDbCreateTableSuffix or RServerDbCreateJHRTTableSpace and RServerDbCreateAHRTTableSpace, the table is created in the default database and tablespace(s). - RServerDbCreateTableSuffix and RServerDbCreateJHRTTableSpace are mutually exclusive. - RServerDbCreateTableSuffix and RServerDbCreateAHRTTableSpace are mutually exclusive. CA strongly recommends that you code RServerDbCreateTableSuffix or RServerDbCreateAHRTTableSpace and RServerDbCreateJHRTTableSpace because if you do not, the tables are created in a default database as follows: - With DB2 v8 or earlier, the tables are created in default database DSNDB04. - With DB2 v9 or later, the tables are created in default database DSNnnnnn, where nnnnn is a number assigned by DB2, for example DSN01260.
