| LU01324 | LU01324   M.C.S. ENTRIES  = ++PTF (LU01324)<br><br><br>IDC3201I OR IDC3202I MESSAGES DURING FAVER RESTORE<br>PROBLEM DESCRIPTION:<br>IDC3201I or IDC3202I messages may be issued during a FAVER RESTORE<br>operation followed by the failure of the restore with RC=0008.<br>When FAVER restores SMS-managed VSAM files, it may convert space<br>allocations from track or cylinder units to kilobytes (KB) or<br>megabytes (MB). In some situations, typically when the primary<br>allocation is very large and the secondary allocation is very<br>small (or vice-versa), FAVER may mis-format the IDCAMS space<br>control statement used to allocate the file during restore.<br>This results in one or both of the following or similar messages:<br>IDC3201I CONSTANT 'xxxxxxxxxxxx' EXCEEDS LENGTH LIMIT<br>IDC3202I ABOVE TEXT BYPASSED UNTIL NEXT COMMAND. CONDITION CODE IS 12<br>where xxxxxxxxxxx is usually unprintable characters.<br>This fix changes FAVER to properly format the allocation values.<br>SYMPTOMS:<br>FAVER Restore operations may fail with RC=8 after IDC3201I or<br>IDC3202I messages.<br>IMPACT:<br>The FAVER Restore operation fails.<br>CIRCUMVENTION:<br>1) Specify BYPASS ACS on the RESTORE options to prevent FAVER from<br>attempting to convert allocations to KBs/MBs. Note that this<br>bypasses ALL ACS processing which may result in unexpected<br>RESTORE behavior.<br>2) Override the space allocations using *AMS control statements.<br>PRODUCT(S) AFFECTED:<br>CA FAVER FOR MVS - Release 4.5<br>Related Problem:<br>FAVERM 13695<br>Copyright (C) 2021 CA.
