S010230	S010230 M.C.S. ENTRIES = ++PTF (S010230) PROC GRP AND WHR PROC GRP IN FG DO NOT CHECK SYNTAX PROBLEM DESCRIPTION: The Processor Group and Where Processor Group EQ, which can be found when Apply List Filter is set to Y, do not check their syntax in Endeavor Foreground. Hence, invalid characters can be introduced and no error will stop the user indicating that the syntax is invalid for the particular field. Another problem that was discovered is that the placeholder (%) does not perform its function for the Processor Group field in Foreground, the placeholder is behaving as a normal character rather than a chracter that can represent any of them. SYMPTOMS: Placeholder not working as it should. Syntax checks not performed. IMPACT: Incorrect use of Processor Group when using placeholder. CIRCUMVENTION: Perform the actions with Quick-Edit. S010233	S010233 M.C.S. ENTRIES = ++PTF (S010233) BSTXCOPY DOES NOT RETURN THE CORRECT REASON CODE FOR BINDER PROBLEM DESCRIPTION: The BSTXCOPY utility returns the return code instead of the reason code for the Binder when used to copy and convert datasets from PDS to PDSE. This leads to customer confusion as the reason code reported is not the same as the reason code that the Binder would have returned and hence, the user cannot find the root cause of the problem.
