Service	Details						
S010054	S010054 M.C.S. ENTRIES = ++PTF (S010054) DATE FILTERS NOT WORKING FOR DIRECT INVOCATION PROBLEM DESCRIPTION: When using Direct Invocation with Job Mode, some parts of date filters functionality are not working. Date filter can be coded in 3 different ways: In MM/DD/YYYY format with slashes as separators (e.g. 01/01/2019), or in MMDDYYYY format without separators (e.g. 01012019), or as a relative date (e.g. -0 for today, or -10 for ten days ago). MMDDYYYY format without separators and relative date is not working for modes ALL, SARO, SAR, EXP, and EXPO. With this solution, date filters functionality is now fully working for all modes. Additionally, this solution provides the capability to use relative dates in online EXP and EXPO modes as well. SYMPTOMS: When trying to use date without separators or relative date with Direct Invocation of ALL, SARO, SAR, EXP, or EXPO mode, Primary Selection panel is displayed with 'Invalid value' error message. IMPACT: Unable to use dates without separators and relative dates for modes ALL, SAR, SARO, EXP, and EXPO. when using Direct Invocation with Date Filters. CIRCUMVENTION: There is no circumvention. PRODUCT(S) AFFECTED: CA-View Release 12.2 CA-View Version 14.0 Related Problem: VIEW 2095 Copyright (C) 2019 CA. All rights reserved.
