S012932	S012932 M.C.S. ENTRIES = ++PTF (S012932) ONLINE_AREA_RELEASE CORRECTIONS FOR MULTI-VOLUME DATASETS PROBLEM DESCRIPTION: The "console-like" command ONLINE_AREA_RELEASE can result in dynamic allocation errors for multi-volume datasets, because the "RLSE" system function does not support reducing the number of volumes the dataset is comprised of. The following error message: DB02828E - ONLINE_AREA_RELEASE bbb aaa ERROR DYN.EXT. ERROR OELEASED. where bbb denotes the base id and aaa the area name, is issued. This solution corrects the use of the "RLSE" function and also the text of the message with regard to the erroneous "OELEASED." at the end. SYMPTOMS: The "console-like" command ONLINE_AREA_RELEASE encounters a dynamic allocation error and issues the above DB02828E error message. IMPACT: As a result of the allocation error, the allocation quantities recorded in the CXX and the system catalog may be slightly different. However, the space actually released should be very close to what was requested by the ONLINE_AREA_RELEASE function. CIRCUMVENTION: None. 	USED BLOCKS TOO HIGH AFTER AN INIT IXX OPTION1=REINIT	
	PROBLEM DESCRIPTION:	
	A CA Datacom/DB IXX uses more space than necessary following a DBUTLTY INIT AREA=IXX with OPTION1=REINIT.	
	SYMPTOMS:	
	A DBUTLTY INIT AREA=IXX with OPTION1=REINIT specified, can result in the corresponding IXX later filling up more quickly, which in turn could cause unneeded Dynamic Extends or a database return code 08(008), "INDEX IS FULL".	
	IMPACT:	
	An index may require more DASD space than necessary, possibly resulting in a database return code 08(008), "INDEX IS FULL", which either will or will not be rectified by a Dynamic Extend.
