SO11494	SO11494 M.C.S. ENTRIES = ++PTF (SO11494) SHOW ACTIVE SHOWS EXITS AS *NONE* PROBLEM DESCRIPTION: SHOW ACTIVE may incorrectly report an exit as *NONE*. The problem occurs when there is an address in the exit anchor point but the GSO EXITS record does not specify a name for the exit. This problem is likely for sites that run third party software products such as ETF/A from EKC which implants addresses in the exit anchor points. This fix also corrects a problem with active exits information in the type 0111 record created by ACFESAGE. In some cases the record contains binary zeroes instead of blanks in the exit exit name. SYMPTOMS: SHOW ACTIVE reports an exit point as *NONE* when an exit is actually in place and active. ACFESAGE type 0111 record may contain binary zeroes instead of blanks for an exit name. IMPACT: SHOW ACTIVE output is erroneous and misleading. ACFESAGE type 0111 records contain binary data. CIRCUMVENTION: None PRODUCT(S) AFFECTED: CA-ACF2-MVS Version 16.0 Related Problem: ACF2MS 10378 Copyright (C) 2020 CA. All rights reserved.
