SO10159	SO10159 M.C.S. ENTRIES = ++PTF (SO10159) XCF SERVICE TIMEOUT DURING PEAK HOURS PROBLEM DESCRIPTION: XCF service ROUTING time out is seen during the peak hours and hence XCF connection is also suspended. It happens when the CPU intensive commands are routed to the master subsystem during the peak hours or when the routed commands, e.g. LISTAPPL, LIST EVENT access operational datasets held by other ESP initiators. The following message is reported incorrectly for every routed command experiencing the time out: ESP4314I XCF transmitter ended. This could result in a repetitive XCF connection suspension. SYMPTOMS: Following error messages are reported: ESP4286W XXCF RECEIVE, nnn second time out, ... ESP4287E XXCF SEND, nnn second time out, ... ESP4220I XCF service ROUTING suspended, ... ESP4314I XCF transmitter ended, Service=ROUTING, ... IMPACT: ESP can perform limited functionality because of the multiple XCF connection time outs. CIRCUMVENTION: Avoid routing CPU intensive commands, LISTAPPL and LIST EVENT commands to the master subsystem during the peak hours. Related Problem: ESPWA 1918 Copyright (C) 2019 CA.
