The WAR file must be deployed to your application server. If you have previously deployed the WAR file with the original file name but plan to use the new default file name: 1. Undeploy the WAR file with the original file name. 2. Deploy the WAR file with the new name. 3. Restart your application server. 4. The application will be accessible on a new url that ends with /web-viewer. Example: https://acme.org/web-viewer/ If you wish to retain the original name, for example to ensure that </pre> |
