SO14219	SO14219 M.C.S. ENTRIES = ++PTF (SO14219) EZT NATIVE MODE MACRO MULTILINE ERRORS PROBLEM DESCRIPTION: Multiple statements on a single line in a user macro fail to compile when using NEWFUNC=Y on Mainframe platform. Compilation returns RC=16. Error messages such as EZTC0395E (unexpected character) and EZTC0128E (fieldname or literal expected) are generated. When using compatibility mode with NEWFUNC=N, compilation is successful with return RC=0 and no errors. SYMPTOMS: User trying to run functional compatibility mode Easytrieve code that uses single line multistatements separated from each other by period, is receiving errors and RC=16 when executing script in native mode NEWFUNC=Y. Typically, error messages: EZTC0395E (unexpected character) and EZTC0128E (fieldname or literal expected) are generated. IMPACT: User can't compile and run some existing 6.4 compatibility mode Easytrieve programs in native (11.6) mode. CIRCUMVENTION: Modify macro to use only single line Easytrieve statements and avoid use of period as multiline separator. Alternatively, continue to use the period character as a multiline separator in your macros, but make sure to put a space character in front of each instance of period separator character. PRODUCTS AFFECTED: CA Easytrieve r11.6 TEST CASE: To reproduce problem Support L1 (Ralf) provided easy test case: EUADG.QA.EZTPLS.JCL(EB6MACT8) Test program running with NEWFUNC=Y fails to compile and return RC16 PRODUCT(S) AFFECTED: CA Easytrieve Runtime Release 11.6 Related Problem: EZTRVE 611 Copyright (C) 2020 CA.
