Service	Details
SO15293	SO15293 M.C.S. ENTRIES = ++PTF (SO15293) UPDATE MOI DUMP PROBLEM DESCRIPTION: The MOI Dump file generated by the 'Run Diagnostics' command for sending log files and diagnostics to Broadcom Support can be very large due to the inclusion of machine learning transaction log files (trans.log). This causes very long upload times at many customer sites. ENHANCEMENT DESCRIPTION: The transaction (trans.log) files are no longer included in MOI Dumps, reducing file upload time to Broadcom. To get the benefit of this PTF, from the Install panels, selecting 8 - Deploy, select Binary RPMS, then press Enter. Update and reboot the appliance from the Manage panels by selecting 9 - Advanced Commands, 12 - Update, 1 - Resend, 2 - Reboot. Now the changes will be seen after executing a new Run Diagnostics command to create a new dump file.
