| SO13947 | <p>SO13947 M.C.S. ENTRIES = ++PTF (SO13947)</p> <p>ABEND 9C7 IN UNLOCK</p> <p>PROBLEM DESCRIPTION:</p> <p>TPX UNLOCK (MODULE=FIXPROG , TASK=ONFPROG) abnormally terminates with System 9C7 code. The user-id is blank, which is an abnormal condition, and causes an incorrect length to be calculated for it. The ONOFF TASK recovers and TPX remains operational.</p> <p>SYMPTOMS:</p> <p>TPX calls the security system through THE SAF RACROUTE API for credentials re-verification for the unlock function. When the USER-ID is blank, the user-id length is incorrectly calculated and RACROUTE VERIFY calls fails with 9C7 abend. The user is unable to unlock the terminal and TPX remains operational.</p> <p>IMPACT:</p> <p>The one user with blank user-id is unable to unlock the terminal while all other users have no impact on them.</p> <p>CIRCUMVENTION:</p> <p>None.</p> <p>PRODUCT(S) AFFECTED:</p> <p>CA-TPX-MULTIPLE SESSION MGR BASIC <span style="float: right;">Release 5.4</span></p> <p>Related Problem:</p> <p>TPX 590</p> <p>Copyright (C) 2020 CA.
