SO11935	SO11935 M.C.S. ENTRIES = ++PTF (SO11935) Z/OSMF WORKFLOW FOR CA VANTAGE STARTUP CONFIGURATION ENHANCEMENT DESCRIPTION: This SYSMOD introduces a z/OSMF workflow for CA Vantage. The workflow process eases the deployment of the CA Vantage runtime (yourVantHLQ.CTU*) libraries and the execution of the initial startup configuration. The initial startup configuration is a set of manual post-installation steps required for CA Vantage to start. These steps include: allocation of non-SMP/E required data sets, execution of security definitions, customization of the configuration required to start the CA Vantage started task with the minimum supported configuration, creation of a CA Vantage started task procedure, copy of the procedure into your system PROCLIB and APF authorization of the CA Vantage load library. Available actions in this workflow: * Create a runtime environment clone of the SMP/E-managed CA Vantage target libraries and perform the initial startup product configuration. * Use the SMP/E-managed CA Vantage target libraries and perform the initial startup product configuration. * Create a runtime environment clone of the SMP/E-managed CA Vantage target libraries. * Create security definitions in CA TSS / CA ACF2 / IBM RACF for the CA Vantage STC. * Dynamically APF authorize the CA Vantage load library. * Start / Stop CA the Vantage started task. * Save the values used in this workflow for further processing. SYMPTOMS: None. IMPACT: None. CIRCUMVENTION: None. PRODUCT(S) AFFECTED: CA Vantage SRM Release 14.0 CA Vantage GMI Release 14.0 Related Problem: VANT 9934 Copyright (C) 2020 CA. All rights reserved.
