SO15626	SO15626 M.C.S. ENTRIES = ++PTF (SO15626) LINK FAILURE ALERTS ARE PRESERVED ACROSS RECYCLE ENHANCEMENT DESCRIPTION: Currently, alerts raised because a link between two regions fails are not closed automatically when the link is re-established, unless the failure was part of a normal shutdown. This PTF introduces the ability to auto-close these alerts on link recovery. ADDITIONAL INFORMATION: The \$AM ALERTS parameter group will have a field added to it - "Link Failure Alerts" - which will accept the following values: OFF - Link Failure Alerting is not done. ON - Alerts are raised for link failures. AUTO - Alerts are closed when the link recovers. SO15985	SO15985 M.C.S. ENTRIES = ++PTF (SO15985) NETMASTER DOC CONTAINS CULTURALLY INSENSITIVE REFERENCES PROBLEM DESCRIPTION: NetMaster's documentation includes computer and networking terminology that is currently considered by many organizations, Broadcom included, to be culturally insensitive and offensive to some users. SYMPTOMS: Users might find culturally insensitive networking and computer terminology in the NetMaster documentation set, including end user manuals, the 3270 interface (panels and help), and in various error messages. In the NetMaster documentation, this specifically refers to use of the term Master/Slave to describe a networking or database relationship. IMPACT: Potentially offending our valued customers and portraying Broadcom in a negative light, as compared to other large organizations with initiatives to remove insensitive terminology. CIRCUMVENTION: None.
