SO16077	SO16077 M.C.S. ENTRIES = ++PTF (SO16077) S0C4 WITH THE CO OPERATOR IN A CRL PROBLEM DESCRIPTION: An abend S0C4 occurs when a Custom Record Layout contains a selection criteria that contains the CO operator. SYMPTOMS: On starting a Browse session, the message "View has experienced an abend S0C4 while initializing for formatted editing. Recovery from the abend was successful however the session has been terminated." shows up. IMPACT: After the abend, the recovery is successful but the browse session is terminated. CIRCUMVENTION: None. PRODUCT(S) AFFECTED: CA File Master Plus common component Version 11.0 CA File Master Plus common component Version 12.0 Related Problem: FMMVS 1460 Copyright (C) 2021 CA. All rights reserved. R00068-FMP110-SP1 DESC(S0C4 WITH THE CO OPERATOR IN A CRL). ++VER (Z038) FMID (CDBIB00) SUP (ST16074 ST16077)

Service	Details
SO16105	SO16105 M.C.S. ENTRIES = ++PTF (SO16105) ABEND IN CAWALDCS WHEN RUNNING LOADINFO COMMAND PROBLEM DESCRIPTION: A SOC4 abend in CAWALDCS+5FA can be detected when running the CAWABATC utility for a LOADINFO command. This problem was not always reproducible at the user's site. It could never be reproduced on the CA systems. SYMPTOMS: The SOC4 system dump has shown that particular situation where the current Directory Block from the load library was allocated just at the end of a memory block (followed by an un-allocated memory block), and the last entry in that memory block refers to an APF authorized load module for which the corresponding AC code (1-byte long) occupies the last position in that entry. The SOC4 occured because our coding is unpacking that AC code field treating it as a 2-byte long field. IMPACT: For some specific configuration of a LOAD library, the user is not able to run the LOADINFO batch command. CIRCUMVENTION: No circumvention is available. PRODUCT(S) AFFECTED: CA File Master Plus common component Version 11.0 CA File Master Plus common component Version 12.0 Related Problem: FMMVS 1459 Copyright (C) 2021 CA. All rights reserved. R00069-FMP110-SP1 DESC(ABEND IN CAWALDCS WHEN RUNNING LOADINFO COMMAND). ++VER (Z038) FMID (CDBIB00) SUP (ST16105)

SO16212	SO16212 M.C.S. ENTRIES = ++PTF (SO16212) ISPF ERROR WHEN EXITING THE DSN LIST DIALOG PROBLEM DESCRIPTION: When a user selects the "D" option (DSN LIST) from the main menu in a File Master for IMS session to finally require an ISPF Browse or ISPF Edit for one of the datasets or library member from the DSN List, then an ISPF session is started from within File Master for IMS. When the user terminates the ISPF session to return back to the DSN List dialog, ISPF error messages are displayed and the File Master for IMS session is terminated. SYMPTOMS: After exiting the ISPF editor session (Browse or Edit), the following error messages are displayed and the File Master for IMS session is terminated. Control is given back to ISPF. *** DISPLAY OF 'CAWKPDLF' RECEIVED A RETURN CODE OF 12 *** Panel 'CAWKPDLF' error *** Panel not found. *** DISPLAY OF 'CAWKPDLS' RECEIVED A RETURN CODE OF 12 *** Panel 'CAWKPDLS' error *** Panel not found. IMPACT: The current File Master for IMS session terminates and control is given back to ISPF. CIRCUMVENTION: There is no circumvention possible. Once the problem occurs, the File Master for IMS session terminates. The user needs to start a new File Master for IMS session from ISPF. PRODUCT(S) AFFECTED: CA File Master Plus for IMS Base Version 11.0 CA File Master Plus for IMS Base Version 12.0 Related Problem: FMIMS 531 Copyright (C) 2021 CA. All rights reserved.
