EMAIL SERVER REJECTS BARE LINEFEEDS IN ATTACHMENTS
PROBLEM DESCRIPTION:
Some email servers require CR+LF record separators in email attachments.
CA Spool email attachments use only LF between records.  This has been
reported when using Symantec Cloud.  A new option will be added to control
whether to use LF or CR+LF.
MIME=LF|CRLF has been added as a parameter on the DRIVPRMn Node parameter
statements.
SYMPTOMS:
Emails are rejected with the following information as the reason:
Your message contains invalid characters (bare line feed characters) which
the email servers at domain.com don't support.
IMPACT:
Sites using email servers that reject bare line feed characters in email
attachments are impacted.
CIRCUMVENTION:
None.
PRODUCT(S) AFFECTED:
CA Spool                                               Version 14.0
