SO15717	<p>SO15717 M.C.S. ENTRIES = ++PTF (SO15717)</p> <p>PROCESS INCOMPLETE MLWTO MESSAGES</p> <p>PROBLEM DESCRIPTION:</p> <p>This PTF processes incomplete or truncated MLWTOs and issues a better SRV258 message.</p> <p>There are WTOs that are processed by the GSS subsystem console routine for various products such as Insight. These WTOs are acted on by IMODS that run in the IServe address space and usually write the messages to an ILOG dataset.</p> <p>Before this PTF, GSS did not handle incomplete MLWTOs. These are Multi-Line WTOs where the last line that should be marked as an End line was not found. There were two problems with these messages:</p> <ol style="list-style-type: none"> 1. They were orphaned in the extended private region of the IServe address space. 2. The product's IMOD was not invoked to process these messages. <p>With this PTF, GSS no longer orphans these messages and they are now processed by the product's IMOD.</p> <p>When GSS discovers one of these incomplete MLWTOs, it previously issued this message as a WTO:</p> <p>SRV258 MLWTO TRUNCATED</p> <p>With this PTF, this message is now printed with more information and written to the IServe ISRVLOG sysout file instead of as a WTO:</p> <p>SRV258 MLWTO Truncated: yy/mm/dd hh.mm.ss jjjjjjjj iiiiiiiii</p> <p>MCB: aaaaaaaaa Lines: # MSGID: mmmmmmmmm</p> <p>As GSS is processing these incomplete MLWTOs, a new message line is appended to the message:</p> <p>SRV379 Truncated MLWTO</p> <p>This alerts you that the message may be missing the last line which was not marked with the End flag.</p> <p>SYMPTOMS:</p> <p>SRV258 MLWTO TRUNCATED</p> <p>IMPACT:</p> <p>Messages were not processed by the product IMOD</p> <p>CIRCUMVENTION:</p> <p>Research why the MLWTO did not have an End line.</p> <p>PRODUCT(S) AFFECTED:</p> <p>CA-Global Subsystem for MVS Release 14.0</p> <p>Related Problem:</p> <p>GSMVS 181</p> <p>Copyright (C) 2021 CA.
