SO15838	SO15838 M.C.S. ENTRIES = ++PTF (SO15838) VARIABLY LOCATED DATA NOT DISPLAYED CORRECTLY IN SYMDUMP PROBLEM DESCRIPTION: When using SYMDUMP/CICS to analyze a dump, variably-located data items are not displayed correctly. (Variably-located data items are items that follow ODO fields, ie. fields defined with an OCCURS DEPENDING ON clause). This problem occurs when using the IBM compiler version 1.2 or higher. SYMPTOMS: When displaying a COBOL structure or field containing ODO and variably-located data using SYMDUMP/CICS using the display CWK option or the CORE command, the data displayed for the variably is not correct; sometimes it contains data from the start of the WORKING-STORAGE section, or simply invalid data. No error messages are displayed for these errors. IMPACT: The user is not able to display correct data for variably-located data. CIRCUMVENTION: The user may be able to view the contents of these data items, in dump format, by using the CORE command specifying the start address of that field. That address is returned when using the CORE command specifying a Cobol field name. PRODUCT(S) AFFECTED: SymDump CICS Component Version 11.0 Related Problem: SYMDUM 494 Copyright (C) 2021 CA.
