SO16209	SO16209 M.C.S. ENTRIES = ++PTF (SO16209) SEND SYNC NOTIFICATION EMAILS TO THE CURRENT SOURCE USERID ENHANCEMENT DESCRIPTION: By default, the Synchronization Notification feature sends an email to the Signout Userid of each out-of-sync Element. If the Element is not signed out, an email is sent to the Last Action Userid. This enhancement introduces a new option in the ENCOPTBL table, which can be turned on in order to change the default behavior to the following: - If the Element has more than one change level, an email is sent to the Last Change Level Userid. - If the Element has only a single change level (base VVLL = last VVLL), an email is sent to the Generate Userid. - If the Element has not been generated yet, an email is sent to the Last Action Userid. Note: If the Move action uses a Generate Processor, the Generate Userid is set to the user who moved the Element.
