LU00366	LU00366 M.C.S. ENTRIES = ++PTF (LU00366) POLICY OVERWRITE UNDER ISPF REJECTED WITH A DCI1131E MESSAGE PROBLEM DESCRIPTION: Policy overwrite under ISPF rejected with a DCI1131E message SYMPTOMS: In ISPF, the max MSU value entered for a group policy overwrite may be truncated if the group ID is longer than 6 characters. This can result in rejection of the overwrite command by the controller. The controller will then issue a DCI1131E error message indicating that the overwrite was rejected due to the fact that the min exceeds max MSU value. IMPACT: The policy overwrite value is rejected under ISPF. CIRCUMVENTION: A modify command can be used through the operator console to overwrite policy values. See the DCI documentation for information on using this comand: F CONTROLR,POLICY,0, cpc-id,type,id,msumin,msumax,duration PRODUCT(S) AFFECTED: CA Dynamic Capacity Intelligence Version 2.0 Related Problem: DYCAPI 12961 Copyright (C) 2021 CA.
