LU01592	LU01592 M.C.S. ENTRIES = ++PTF (LU01592)	
	CCS LMP JAVA INTERFACE VERSION < 7 CHARS	
	PROBLEM DESCRIPTION:	
	If a product uses the LMP java interface to perform LMP checks and passes a version string that is shorter than 7 characters, the version that is passed to the LMP check will include ascii characters which will cause the parser to fail, resulting in LMP using a default version value of 15.00.00	
	SYMPTOMS:	
	The version that is listed on the ISV SCRT report for a product that uses the LMP java interface may not match the version of the actual product that made the LMP check.	
	IMPACT:	
	The ISV SCRT report could include incorrect data.	
	CIRCUMVENTION:	
	The caller of the java interface should ensure that version contains at least 7 characters.	
	PRODUCT(S) AFFECTED:	
	CCS Java to z/OS Service	Version 15.0
	Related Problem:
