LU01510	LU01510 M.C.S. ENTRIES = ++PTF (LU01510) INCD PANEL MISSING & DOC COMPILE LISTING BAD AFTER S015340 PROBLEM DESCRIPTION: 1. S015340 is missing the INCD panels delivered by S010633. This prevents the use of the D IND DOC command with edit margins set to RIGHT. 2. After S015340, the compile listing for DOCUMENT parameters displays incorrectly. SYMPTOMS: 1. If S015340 and S010633 are applied at the same time, the INCD panels (#MPINCD and @MPINCD) are not found when performing the HOLD ACTION for S010633. 2. The compile listing for DOCUMENT parameters may show missing values or corruption of the parameter text. IMPACT: 1. The HOLD ACTION for S010633 cannot be performed when both solutions are applied at the same time. 2. Only the print of the compile listing is affected. Parameters show correctly when displaying the DOCUMENT. CIRCUMVENTION: 1. Apply S010633 first and perform the HOLD ACTION for it. You are then able to apply S015340 and perform the HOLD ACTION for it. 2. None. PRODUCT(S) AFFECTED: CA Ideal CA Datacom Release 15.1 Related Problem: IDEAL 13865 Copyright (C) 2021 CA. LU01589	LU01589 M.C.S. ENTRIES = ++PTF (LU01589) RC08 WITH NO ERROR MESSAGES FOR VERIFY LIBRARY PROBLEM DESCRIPTION: When IDUTILTY is used to verify a library, the job completes with a RC8 when no errors are reported. This solution modifies the return code values for the VERIFY job to be RC0 when no errors are found, RC4 when informational messages are recieved, or RC8 when there was an error running the job. SYMPTOMS: The IDUTILTY VERIFY job receives a RC8 with no errors reported. IMPACT: This may cause manual checking of the job for errors. CIRCUMVENTION: None. 	USERS WITH NO AUTHORITY IN SYSTEM SHOW AS UPDATE		
	PROBLEM DESCRIPTION:		
	When a user definition is created in batch via DDUPDATE and related to a sytem without the authority level on a 1003 DATA card, this appears as a level of UPDATE. This is a cosmetic problem only, as without READ access, no updates can actually be done.		
	SYMPTOMS:		
	DISPLAY USER shows UPDATE authority, when none has been set.		
	IMPACT:		
	This is cosmetic only. Without READ access, the UPDATE is ineffective.		
	CIRCUMVENTION:		
	None.
