Service	Details
SO15291	SO15291 M.C.S. ENTRIES = ++PTF (SO15291) USING SYNCSORT AND DFSORT IN SAME JOB ONLY USES ONE. PROBLEM DESCRIPTION: JCLCheck does not detect when the sort product being used changes in a single JCL job. If step1 has PGM=SYNCSORT and step2 has the default sort PGM=SORT (site default is DFSORT), then both steps will be considered to be SYNCSORT and this can result in errors if the DFSORT step uses features not supported by SYNCSORT. The same would occur if the order was reversed (DFSORT, then SYNCSORT), DFSORT checking would be used for both steps. Various sort statement errors may be reported. SYMPTOMS: Various sort statement errors may be reported. IMPACT: Incorrect errors may be reported when using DFSORT and SYNCSORT in the same job. CIRCUMVENTION: None. PRODUCT(S) AFFECTED: CA JCLCheck Release 12.0 Related Problem: JCLCHK 1696 Copyright (C) 2021 CA. All rights reserved.
