However, there was no HOLD ACTION indicating that AL2DBI04 had to be executed to make the new column names available to SQL. This PTF includes that HOLD ACTION. SYMPTOMS: Attempts to extract data using SQL and the new column names will fail. IMPACT: Data will not be returned. CIRCUMVENTION: None. This will only occur if the job mask specified retrieves more than 17,250+ jobs. SYMPTOMS: The Define Perspective Open Jobs View function returns jobs that do not match the specified jobname job mask. These are typically seen at the end of the screen display. IMPACT: More data returned than expected. CIRCUMVENTION: Make the jobname job mask more restrictive.
