LU02928	LU02928 M.C.S. ENTRIES = ++PTF (LU02928) UNINITIALIZED RECORD FIELDS ARE SET TO A SPACE CHARACTER PROBLEM DESCRIPTION: If the program writes a report to the file, all fields which were not initialised (including numeric types), will be filled with a space character (0x20). The problem is related to distributed platforms only. A new runtime option FILEFILL was added, which allows to select the default fill character (S=space, Z=zero). SYMPTOMS: Uninitialised fields are filled with space characters. IMPACT: Easytrieve used a 0x0 fill character by default up until 2014. The program output may be inconsistent if Easytrieve is upgraded. CIRCUMVENTION: Explicitly initialise all fields.
