Service	Details
LU03248	LU03248 M.C.S. ENTRIES = ++PTF (LU03248) SARBCH LISTVIEW, SARBCH DEFVIEW, AND DEF VIEW CORRECTIONS PROBLEM DESCRIPTION: This APAR provides the following corrections to SARBCH LISTVIEW, SARBCH DEFVIEW, and online logical view definitions. - SARBCH LISTVIEW creates /DEFVIEW control statement that results in syntax error if relative reference symbols comma ",", left parenthesis "(", right parenthesis ")", quote "'", and double quote '"' are used. These reference symbols and the associated line and column references will be enclosed in quotes or double quotes. - SARBCH DEFVIEW enhanced to support quoted strings for search reference symbol, search line, search column, index line, and index column relative reference that contain comma ",", left parenthesis "(", right parenthesis ")", quote "'", and double quote '"'. - Add ability for SARBCH DEFVIEW to remove heading, column, search, and/or index specifications. These specifications can now be removed by specifying the HEADING, COLUMN, SEARCH, and/or INDEX keyword with no parameter data (i.e., HEADING= , COLUMN= , SEARCH= , or INDEX=). If the keyword is not provided, the cooresponding parameter specifications will be copied from the old logical view definition if one exists. - SARBCH DEFVIEW enhanced to validate index name, bounds of index and search line references, and range of search columns. - SARBCH DEFVIEW update of search specifications without index specifications may result in incorrect index relative line and column references. - Reject multiple specifications of the same reference symbol in the search specification. - Extra character appended to end of logical view definition by SARBCH DEFVIEW causes online to prompt user to save view when it was not changed. - Leading zeros not removed from line and column relative references in online display of search and index specifications. - Online DEF VIEW may present old logical view definition specifications if logical view definition is updated in batch just before selection. SYMPTOMS: SARBCH DEFVIEW may generate SARBCH10, SARBCH12, SARBCH13, or SARBCH19 error messages or generate incorrect logical view search and indexing specifications. IMPACT: Certain logical view definitions may not be able to be maintained in batch. CIRCUMVENTION: Perform logical view definition maintenance online. PRODUCT(S) AFFECTED: CA-View Release 12.2 CA-View Version 14.0 Related Problem: VIEW 15112 Copyright (C) 2021 CA. All rights reserved. R00238-BRM140-SP1
