ENTRIES = ++PTF (LU03062) SCRT REPORTING IMPROVEMENTS ENHANCEMENT DESCRIPTION: ACF2 and Top Secret DB2 are enhanced to meet the latest requirements for the License Management Program (LMP) and Sub-Capacity(SCRT) Reporting Tool (SCRT). This enhancement ensures the products register with LMP. The enhancement also makes these products are current with the LMP parameters so that the appropriate data for SCRT is recorded in SMF. This enhancement is transparent to our customers and their end-users. SCRT ISV for Broadcom correctly displays products metrics in the reports at the customer site. LU03497	LU03497 M.C.S. ENTRIES = ++PTF (LU03497) PTF TRACKING ELEMENT LEVEL SET PROBLEM DESCRIPTION: This PTF will enable you to use a feature in SYSVIEW called Product PTF Analysis. This PTF delivers an element that contains metadata for all published PTFs for ACF2 for DB2 Option. What is Product PTF Analysis? Product PTF Analysis combines PTF tracking elements from your run-time XML library with maintenance data found in your product SMP/E installation CSI library. Product PTF Analysis provides the ability to: * Determine the PTFs and APARs currently applied. * View detailed descriptions of published PTFs. * Using the Cross System component, you are able to compare the PTFs applied on each LPAR. * Detailed SYSMOD information can be viewed from the SMP/E CSI data set used during installation and maintenance. Product PTF Analysis shows this information for all Broadcom Mainframe products that have the necessary XML data available. Please note that not every product will update XML data for all prior and new fixes at the same time. Consult each product's documentation for more information. How can I view Product PTF Analysis? SYSVIEW 16.0 Feature PTF LU03153 added a Product PTF Analysis feature that performs an analysis of product SMP/E CSIs and PTF tracking metadata. A PTFS command was added to SYSVIEW 16.0 with PTF LU03153 that performs the analysis.
