LU03305	LU03305 M.C.S. ENTRIES = ++PTF (LU03305) DISALLOW CREATE INDEX WITH NAME THAT BEGINS WITH "ROWID" PROBLEM DESCRIPTION: Create index with name ROWIDnnnn does not work correctly. It simulates adding a default index on a table, but not all the properties are set correctly. ROWID is a reserved word for default index on a table and should not be used for an index name in a create index statement. SYMPTOMS: If this is the only index on a table, the rows may not be clustered properly as the table's location mode may not be set correctly. IMPACT: The way the rows in a table are stored may be impacted. You could possibly create a ROWID index that may be the default index for another table. CIRCUMVENTION: To re-add the default index to a table, use ALTER TABLE xxx ADD DEFAULT INDEX; PRODUCT(S) AFFECTED: CA IDMS Base Option Version 19.0 Related Problem: IDMS 14860 Copyright (C) 2021 CA. CA RS 2112 - PTF LU03305 Details

Service	Details
	* STEPS TO PERFORM * ***** After installing this PTF, please use the IDMSDDDL utility to update your SYSTEM dictionary's message area with the input in source member DB001. Please note using this member will result in the update of all messages contained within DB001. You may optionally decide to only update the specific message associated with this correction. To do this simply include message DB006061 as input to the IDMSDDDL utility. The source will be in the SMP/E CAGJSRC library.).
