LU04335	<p>LU04335 M.C.S. ENTRIES = ++PTF (LU04335)</p> <p>USER VARIABLES WITH JOB/SUBAPPL SCOPE</p> <p>ENHANCEMENT DESCRIPTION:</p> <p>This enhancement introduces the APPL statement operand VAR_SCOPE. When VAR_SCOPE(JOB) is specified for the ESP application, the user variables defined for the particular JOB/ENDJOB or SUBAPPL definitions are valid only in this scope. The variables which are not defined within the JOB/ENDJOB scope but they are referenced there take their values from the corresponding SUBAPPL (if defined) or global scope. The same applies for the SUBAPPL level.</p> <p>Operand syntax: VAR_SCOPE(APPL) - default VAR_SCOPE(JOB)</p> <p>Example: APPL TEST WAIT VAR_SCOPE(JOB)</p> <pre>VAR = 'HELLO' ECHO %VAR JOB DUMMY VAR = 'BYE-BYE' ECHO %VAR RUN ANY ENDJOB ECHO %VAR Output: HELLO BYE-BYE HELLO</pre> <p>PRODUCT(S) AFFECTED:</p> <p>CA WORKLOAD AUTOMATION ESP EDITION Version 12.0</p> <p>Related Problem:</p> <p>ESPWA 1942</p> <p>(C) 2022 Broadcom Inc and/or its subsidiaries; All rights reserved</p> <p>R00253-D7Y120</p> <p>DESC(USER VARIABLES WITH JOB/SUBAPPL SCOPE).</p> <p>++VER (Z038)</p> <p>FMID (CD7YC00)</p> <p>PRE (LU02984 LU04235 LU04550 S009670)</p> <p>SUP (LT01087 LT01771 LT03464 LT03636 LT03687 LT03705 LT03811 LT04335 S005800 S006146 ST05800 ST06146 ST09343 ST09910)</p>

Write access to USS path where wla-esp-ix.jar is deployed, or where the WEBPROP property ix.db.path is pointing to. +-----+ ***** * STEPS TO PERFORM * ***** 1. Stop the Intelligent Experience server by issuing 'P <espixstc>' command from the Operator console before applying the PTF. 2. a. Delete the Intelligent Experience database directory, or b. Set the ix.db.path property to a new location. The database directory is set by ix.db.path property in WEBPROP configuration member. The property is set to ix.db.path=./DB by default. That means the database resides in the same USS path where the wla-esp-ix.jar is placed and that is specified by ESPWEB_HOME environment variable in WEBOPTS configuration member. After the database is deleted or the location changed, the database is automatically recreated from scratch. 3.
