LU05447	LU05447 M.C.S. ENTRIES = ++PTF (LU05447) WEB VIEWER: PREVENT UNLIMITED REPORT ACTIONS PROBLEM DESCRIPTION: Web Viewer 14.0 web interface allows applying Open, Save, Print, or Export report actions to an unrestricted amount of reports, only requiring acknowledgement of a confirmation dialog, but not limiting the upper limit of actionable reports. With this PTF applied, users will be only allowed to perform Open, Save, Print, or Export report actions with 20 applicable reports at once. If they select more applicable reports, they are presented with a warning message instead, and no report action is performed until they limit their selection below this limit. SYMPTOMS: Very large amount of reports is selected (for example several hundreds), and Open, Save, Print, or Export report action is performed on all selected reports, the amount of actioned reports is confirmed, and the browser starts opening a tab for each applicable report to perform the report action. IMPACT: Browser client can become slow or unresponsive for the user performing the report action. Product performance for other users can become degraded. System performance may be impacted if the repository is set to Recallable and the selection includes a large number of reports to be recalled. CIRCUMVENTION: Users should cancel the report action in the confirmation dialog that indicates the action will be performed on more than 20 reports.
