LU05345	LU05345 M.C.S. ENTRIES = ++PTF (LU05345) GSVX552W REFERENCING CLIST VARIABLE IN AN IF PROBLEM DESCRIPTION: In a CLIST or CAPTURE member, referencing a CLIST parameter variable like &1 in an)IF statement does not work. The)IF statement gets processed as the member is read in, and any CLIST variables have not yet been defined at that point. This only affects variables that are created to represent parameters passed on the CLIST command, whether the CLIST command was issued by a user or via an event capture triggered from a threshold or the CAPTURE command. Other variables such as &SYSNAME already exist and are substituted properly on an)IF statement. SYMPTOMS: Referencing a CLIST parameter variable (&n) in an)IF statement does not work and produces a message similar to the following: GSVX552W Variable not defined - &1 IMPACT: Cannot use parameters passed to a CLIST on an)IF statement. CIRCUMVENTION: None.
