	been added to the resource checking module (SASSRRSC). This new resource is L2APIRCR. This resource is required for the new Virtual Resource Management resource count resource endpoint (RM.7 in native CA 7). Additional instructions for defining the resource rules can be found in the CA 7 12.1 documentation under 'Securing the CA 7 REST API'. Sites NOT planning on using the CA 7 REST API services will still need to apply the PTF. They can bypass defining the security rules needed to secure these services.).
