Service	Details
LU05471	LU05471 M.C.S. ENTRIES = ++PTF (LU05471) TRANSFORMATION REPORT TRANSFORMS UNEXPECTEDLY PROBLEM DESCRIPTION: When the lower case r option is specified on the TRANSFRM parameter the transformation report log that is written to Spool may also be transformed. This will occur if the r option is used without the K option. For example, the problem occurs when TRANSFRM=A2PCr is specified but it does not happen if TRANSFRM=A2PCrK is specified. SYMPTOMS: After the original input file is transformed, the transformation report file is transformed. This leads to a logical loop where each successive transformation report file is also transformed. IMPACT: Over time, the continuous unexpected transformations may fill the SPOOLDS files. CIRCUMVENTION: Specify the K option with the lower case r option.
