Service	Details
LU05810	LU05810 M.C.S. ENTRIES = ++PTF (LU05810) ABEND S0C4 AFTER DYNAMIC UPGRADE FROM TLMS R12.6 TO R14.0 PROBLEM DESCRIPTION: After a dynamic upgrade from TLMS r12.6 to r14.0, a S0C4 abend may occur during WTO SSI processing of a tape mount message. This is because of storage being referenced with the new increased length of the CA TLMS Mount_List_Element_Table v/s the length of the r12.6 Mount_List_Element_Table Also during a Dynamic upgrade from TLMS 12.6 to TLMS 14.0, it is possible that a X'18' byte overlay could occur if the last entry in the TLMS Mount_List_Element_Table is cleared with the length defined in R14.0. SYMPTOMS: Abend S0C4 during WTO SSI processing of a tape mount message. Unknown. This has not been reported but internal code review found a condition where this could occur. IMPACT: Unknown. CIRCUMVENTION: Use an IPL to bring up TLMS R14.0 PRODUCT(S) AFFECTED: CATLMSMVSTapeManagement Version14.0 Related Problem: TLMS 965 (C) 2022 Broadcom Inc and/or its subsidiaries; All rights reserved R00023-ATL140 DESC(ABEND S0C4 AFTER DYNAMIC UPGRADE FROM TLMS R12.6 TO R14.0). ++VER (Z038) FMID (CATLE00) PRE (RO92245) SUP (LT05810) ++HOLD (LU05810) SYSTEM FMID(CATLE00) REASON (ACTION) DATE (22154) COMMENT (`+----------------------------------------------------------------------+` `|     TLMS Tape Management                        Version 14.0     |` `+----------+-----------------------------------------------------------+` `|SEQUENCE	After Apply |` `+----------+---+` `|PURPOSE	TO ACTIVATE THE CHANGE WITHOUT AN IPL. |` `+----------+---+` `|USERS	ALL USERS. |` `|AFFECTED	|` `+----------+---+` `|KNOWLEDGE	HOW TO PERFORM A PDSE REFRESH. |` `|REQUIRED	|` `+----------+---+` `|ACCESS	ABILITY TO ISSUE OPERATOR COMMANDS. |` `|REQUIRED	|` `+----------+---+` `*************************` `* STEPS TO PERFORM *`

Service	Details

	`**************************`
	Prior to performing the dynamic upgrade from 12.6 to 14.0, apply
	this solution. If the hlq.TLMS.CTAPLINK has already been
	converted to a PDSE, then issue the following command to
	refresh the PDSE. The PDSE conversion was a requirement with
	SO14539.
	`V SMS,PDSE,REFRESH,DSN(hlq.TLMS.CTAPLINK)`
	Then proceed with the dynamic upgrade as outlined in the Migration
	Information section of the TLMS 14.0 Installing manual.
	`).`
