Service	Details
LU06325	<p>LU06325 M.C.S. ENTRIES = ++PTF (LU06325)</p> <p>ABENDOC7 AT SMFIDSXM+0732</p> <p>PROBLEM DESCRIPTION:</p> <p>It is possible for the SMF Director Dump archive index to have invalid low date/time and high date/time entries. This can come about following AUTODELETE if there is a mix of SMF dump files that contain extended SMF record types and those that don't.</p> <p>SYMPTOMS:</p> <p>The following message appears in the SMF Director Audit Report following the completion of the actual SMF dump during the dump process:</p> <p>CAF2899T RUN ABENDED SYSTEM=OC7, IN SMFIDSXM+000732</p> <p>Other symptoms are possible. SMF data that was processed during this dump process is not lost. The CAF2407I message indicates where the SMF data was written.</p> <p>IMPACT:</p> <p>The SCDS file is rendered unusable. SMF Data is not lost, but the SCDS cannot be used for the dump process, extract process or other processes. A BACKUP/RESTORE reset of the SCDS does not clear the problem.</p> <p>CIRCUMVENTION:</p> <p>Customers who run into this issue will need to allocate a second SCDS file to act as an archive for their SMF data. Once this fix is applied, the SCDS entries from the previous SCDS that had the problem can be added to the new production SCDS using ADDX control statement or via a SOURCE Dump.</p> <p>PRODUCT(S) AFFECTED:</p> <p>SMF Director Release 12.7</p> <p>Related Problem:</p> <p>JARSSM 17502</p> <p>(C) 2022 Broadcom Inc and/or its subsidiaries; All rights reserved</p> <p>R00081-ASF127</p> <p>DESC (ABENDOC7 AT SMFIDSXM+0732).</p> <p>++VER (Z038)</p> <p>FMID (CASFC70)</p> <p>PRE (LU03800 LU04587 R068923 R076087 R097894)</p> <p>SUP (DC68249 LT06325 S008722 ST08658 ST08722 ST09754)</p> <p>MCS LU06325 STARTS ON PAGE 0002</p>
