+-----+-----+-----+		
Spool Java Transformers Version 14.0		
+-----+-----+-----+		
SEQUENCE After Apply		
+-----+-----+-----+		
PURPOSE Restore the new Spool Java Transformers engine		
build 22.2.00 into the desired USS directory and enable		
its use by the Spool Java Transformers FSS task.		
This is an upgrade to the latest release of Output		
Transformation Engine from OpenText.		
+-----+-----+-----+		
USERS Users who wish to update the Spool Java Transformers.		
AFFECTED		
+-----+-----+-----+		
KNOWLEDGE 1. Customizing the Spool Java Transformers.		
REQUIRED 2. SMP/E		
+-----+-----+-----+		
ACCESS 1. The Spool Java Transformers' target libraries.		
REQUIRED 2. USS directories where the Spool Java Transformers		
are deployed.		
+-----+-----+-----+		

* STEPS TO PERFORM *		

Service	Details
	***** 1. Tailor and submit CAI.CEOCJCL(BQ4JJTAR) to restore the CEOCDATA(D2ETAR) TAR backup file delivered by this PTF. IMPORTANT: New versions of all directories and files are supplied in the CEOCDATA(D2ETAR) file. The best practice is to restore the new OpenText release to a new directory name so that any customized parameter files are not overwritten. In most cases, customized parameter files would be stored in the /tpv/CAI/caspoold2e/xenos/apps directory. 2. Update the variables in the CAIQENVA member in CAI.CEOCPARM to use directories delivered with the latest Java Transformers release. If you update the APPS= variable, be sure to copy and replace any customized parameter files from the /apps directory in the old release to the /apps directory in the new release. 3. Synchronize the implementation of the use of the new Java Transformers release supplied by LU06408 with the CEOCPLD updates supplied by LU06409 when moving into the production environment.).
