Service	Details
LU06897	LU06897 M.C.S. ENTRIES = ++PTF (LU06897) NEW FEATURE - VIEW REDISTRIBUTION OF DELIVER DYNAMIC REPORT ENHANCEMENT DESCRIPTION: This enhancement will provide View with the ability to distribute or redistribute the pages of a Deliver dynamic report. Dynamic reports that are produced by Deliver and archived by View identify the recipients of all pages of the report. This ability is being extended to support Deliver dynamic reports that are added to the View database with the View Database Build Utility (SARDBB) and to support reevaluation of the recipients of a Deliver dynamic report with the View Batch Utility (SARBCH). The View Database Build Utility (SARDBB) ARCHIVE and LOAD functions will support a new DYNAMIC=D designation that will load the dynamic report data into the View database and determine the recipients of the page data based on the Deliver dynamic report definition. These reports will be fully accessible in ALL, EXP, and EXPO modes. The View Batch Utility (SARBCH) INDEX control statement will also support a new DYNAMIC=D specification to reevaluate the recipients of the page data for a Deliver dynamic report when the report definition have been changed in the Deliver database. The following messages may be issued by the SARDBB and SARBCH utilities due to normal processing or errors: SARDBB70 Deliver database not defined to View database for DYNAMIC=D processing - data record nnn dropped Reason: DYNAMIC=D processing has been designated for a report but the EXPRESS initialization parameter has not be set in View. Action: Run the SARINIT utility and provide Deliver database name on the EXPRESS initialization parameter statement and reprocess the indicated data record with SARDBB. SARDBB71 Deliver RMODYD module not available for DYNAMIC=D processing - data record nnn dropped Reason: DYNAMIC=D processing has been designated for a report but STEPLIB, JOBLIB, or the link list does not reference a library that contains the Deliver dynamic distribution program RMODYD. Action: Make sure APAR LU06660 is installed. Issue STEPLIB, JOBLIB, or link list is referncing correct load library, and reprocess the indicated data record with SARDBB. SARDBB72 Unable to initiate DYNAMIC=D processing for report - data record nnn dropped Reason: DYNAMIC=D processing cannot be performed for a report. The reason for the error will be indicated on a following RMODYD message. Action: Refer to the RMODYD message for resolution and reprocess the indicated record with SARDBB. SARCPI16 Dynamic report has been redistributed Reason: The recipients of the dynamic report have been reevaluted and recorded in the View database. Action: None. RMODYD02 Load failed for Deliver interface routine Reason: The Deliver subsystem interface routine are not

Service	Details
	available to perform dynamic report processing. Action: Issue that STEPLIB, JOBLIB, or link list references the Deliver load library and reprocess the request. RMODYD03 Database dbhlq not found Reason: The indicated Deliver database does not exist. Action: Make sure View EXPRESS initialization parameter references the correct Deliver data base name and reprocess the request. RMODYD04 Database dbhlq at incorrect release level Reason: The indicated Deliver database is not versioned to a support level of the database. Action: Version the Deliver database to an acceptable level and reprocess the request. RMODYD05 Report xxxxxxxx not defined to Deliver database Reason: The indicated Deliver report was not found in the Deliver database. Action: Make sure that the correct Deliver report name and/or database is provided and reprocess the request. RMODYD06 Report xxxxxxxx not dynamic Reason: The indicated Deliver report is not defined as a dynamic report in the Deliver database. Action: Make sure that the correct Deliver report name and/or database is provided and reprocess the request. PRODUCT(S) AFFECTED: View Version 14.0 Related Problem: VIEW 17824 (C) 2022 Broadcom Inc and/or its subsidiaries; All rights reserved R00278-BRM140 DESC(NEW FEATURE - VIEW REDISTRIBUTION OF DELIVER DYNAMIC REPORT). ++VER (Z038) FMID (CBRME00) PRE (LU00151 LU01858 LU03552 R095789 R097347 S000181 S000445 S009495 S010882 S012369) SUP (LT06897 R096744 R097685 TR96744 TR97685) ++IF FMID(CBRNE00) REQ(LU06660 LU06930).

LU06974	LU06974 M.C.S. ENTRIES = ++PTF (LU06974) WEB VIEWER: SUPPORT FOR A CONFIGURABLE APPLID ENHANCEMENT DESCRIPTION: Support for a Configurable APPLID You can now set the APPLID used by Web Viewer r14 for the following SAF security calls: - Validating the user supplied credentials. - User requested change password. - Creating a security environment for the user. As these are SAF calls, the APPLID will be set regardless of which ESM you are using - ACF2, Top Secret or IBM RACF. The APPLID can be configured by setting the WV_SECURITY_MAINFRAME_APPLID environment variable in the environment context of the application server. If not specified, the APPLID will default to OMVSAPPL for compatibility with Web Viewer r14 prior to this enhancement. PRODUCT(S) AFFECTED: Output Management Web Viewer Version 14.0 Related Problem: DVWEB 17649 (C) 2022 Broadcom Inc and/or its subsidiaries; All rights reserved R00280-BRM140 DESC(WEB VIEWER: SUPPORT FOR A CONFIGURABLE APPLID). ++VER (Z038) FMID (CCAFE00) PRE (LU02773 LU03556 LU05268 LU06222 R095796 R097299 R098743 R099656 S000833 S004736 S005125 S005604 S007570 S008227 S008748 S009293 S009485 S010154 S010219 S010240 S010327 S011025 S011199 S011441 S011763 S012768 S013261 S013705 S013818 S014380 S014733 S015006) SUP (AL03858 AL04278 AL05268 BC04581 LT00941 LT01430 LT01431 LT01714 LT02101 LT02576 LT03126 LT03672 LT03858 LT03937 LT04278 LT04933 LT05447 LT05877 LT05942 LT06279 LT06499 LT06509 LT06710 LT06740 LT06974 LU00941 LU01430 LU01431 LU01714 LU02576 LU03126 LU03672 LU03858 LU03937 LU04278 LU04933 LU05447 LU05877 LU05942 LU06279 LU06710 LU06740 R099491 S010164 S010287 S012642 S015240 S015318 S015458 S015559 S015703 S015976 ST09598 ST10164 ST10287 ST11217 ST12642 ST15240 ST15318 ST15458 ST15559 ST15703 ST15976 TR99491) ++HOLD (LU06974) SYSTEM FMID(CCAFE00) REASON (ACTION) DATE (22227) COMMENT (+-----+ Output Management Web Viewer Version 14.0 +-----+ SEQUENCE After Apply +-----+ PURPOSE Update CVDELOAD load library and redeploy Web Viewer WAR/EAR File. +-----+ USERS All users. LU07021	LU07021 M.C.S. ENTRIES = ++PTF (LU07021) CSSMTP EMAIL TEXT ATTACHMENT MISSING CHARACTERS PROBLEM DESCRIPTION: When the JOB/REPORT/SYSOUT is emailed from View using CSSMTP some characters are inconsistent or missing in the text file attachment. SYMPTOMS: Characters are inconsistent or missing in the text file attachment. IMPACT: Data inconsistency in the text file causes problems to understand the JOB/REPORT/SYSOUT data. CIRCUMVENTION: None. PRODUCT(S) AFFECTED: View Version 14.0 Related Problem: VIEW 18029 (C) 2022 Broadcom Inc and/or its subsidiaries; All rights reserved R00281-BRM140 DESC(CSSMTP EMAIL TEXT ATTACHMENT MISSING CHARACTERS). ++VER (Z038) FMID (CBRME00) PRE (LU03552 LU06330 S000440 S010330) SUP (LT06773 LT07021 LU06773 S004100 ST04100)

Service	Details
LU07064	LU07064 M.C.S. ENTRIES = ++PTF (LU07064) WEB VIEWER: REST API INCORRECT EMPTY RESULT PROCESSING PROBLEM DESCRIPTION: Some product REST API operations returning lists of items (for example list repositories) indicate the processing has failed when the result is empty even if the result correctly represents an empty list. Product REST API operations retrieving report data fail for empty reports (TEXT reports with no lines). The affected operations are: GET /v1/view/repository GET /v1/view/rptlist/{repositoryId} GET /v1/view/rptdata/{repositoryId}/{reportHandle} GET /v1/view/rptdata/download/{repositoryId}/{reportHandle} POST /v1/view/rptdata/download/{repositoryId}/{reportHandle} POST /v1/view/rptdata/export/{repositoryId}/{reportHandle} SYMPTOMS: For REST API operations that return content type application/json response, the status field status has value indicates ERROR, the result list is missing or is an empty array, and the messages array contains entries with a longText field starting with CAHVS0108I, CAHVS0151E, CAHVS0162E, or CAHVS0182I. For REST API operations that return other content types other than application/json, REST API operations on TEXT reports with no lines fail with an HTTP return code other than 200 or the file content is invalid. IMPACT: The Rresponse field status alone can not be used to identify whether the REST API call has failed, or whether the response represents an empty list. For empty TEXT reports, the file content is incorrect and the HTTP return code alone can not be used to identify whether the operation failed. CIRCUMVENTION: Inspect the messages returned in the response to verify whether the empty result is expected (only messages CAHVS0108I, CAHVS0151E, CAHVS0162E, or CAHVS0182I are present), or whether a different error occurred. Verify TEXT reports have non-zero report lines before retrieving converted report data using REST API operations.
