REQUIRED  +-----+-----+  ACCESS     Vantage libraries.   REQUIRED  +-----+-----+  ***** * STEPS   TO   PERFORM * *****  1.Apply the LU06691 SYSMOD and recycle the Vantage STC. 2.If you want to create a new summary object that uses the Value method and will summarize hundreds of thousands of records for one or more fields (columns), add also sorting (Ascending or Descending) by those fields (columns) to the Summary object definition.  In combination with sorting, this SYSMOD ensures that the related summary object will be executed much faster. This effect will be noticeable for objects that summarize hundreds of thousands or millions of records.  Objects that summarize data with thousands of records execute quickly without this SYSMOD.  Recommended:  If a summary object takes a long time to execute, review the object settings. If it uses the Value method, then recreate the summary object and add sorting.  Note:  For more information see 'Using - Summary Objects - Summary Object Details' in the Vantage documentation, available at: <a href="https://techdocs.broadcom.com/vantage">https://techdocs.broadcom.com/vantage</a> ). </pre>
