LU07243	LU07243 M.C.S. ENTRIES = ++PTF (LU07243) SMART/PRECOMPILER COMMENTS OUT COMMIT WHEN DB2 ATTACH(RRSAP) PROBLEM DESCRIPTION: When attempting to use Smart/RRSAP and Smart/RESTART with an application that uses Db2 option ATTACH(RRSAP), the Smart/PRECOMPILER comments out COMMIT and ROLLBACK code generated by the Db2 precompiler, so no Smart/RESTART checkpoint and rollback functions are executed. With this fix the Smart/PRECOMPILER will generate an error message when this situation is detected. Smart/RRSAP does not support Db2 applications using the Db2 option ATTACH(RRSAP). The only Db2 ATTACH setting supported is "TSO". In Smart/RRSAP, for an application to use RRSAP it should use the Db2 option ATTACH(TSO) and at run-time use the Smart/RRSAP option ATTACH(RRSAP). See sections "The Db2 Host Language Interface" and "The ATTACH Parameter" of the Smart Jobstream Series documentation. SYMPTOMS: No Smart/RESTART checkpoint and rollback functions are executed. IMPACT: No Db2 COMMIT and ROLLBACK requests are executed so no RESTART is possible. CIRCUMVENTION: In Smart/RRSAP, for an application to use RRSAP it should use the Db2 option ATTACH(TSO) and at run-time the job should use the Smart/RRSAP option ATTACH(RRSAP).
