LU07405	LU07405 M.C.S. ENTRIES = ++PTF (LU07405) REWORK(2022293) U1005 ABEND WITH PRINT/EMAIL AND CAN'T EMAIL AFTER DS PRINT PROBLEM DESCRIPTION: U1005 abend when trying to Print/Email the same index again or another index for the Report/Sysout without exiting the 'Page Index Selection List' in the View. Unable to Email a Report/Sysout after allocating a dataset using the print to dataset Feature in the View. SYMPTOMS: View Page Index Selection List panel session terminating with U1005 abend. After completing the Email attribute panel and press enter, instead of sending Email, the 'Allocate New Data set' panel appears. IMPACT: User session terminates and the user has to login again to View. The user ends up with an 'Allocate New Data set' panel instead of sending Email, not able to do any further action in the panel. CIRCUMVENTION: To avoid abend, Exit 'Page Index Selection List' before trying to print/email again on the same index or another index for the Report/Sysout. To send an email successfully and avoid the Allocate New Data set' panel then Exit the View session and login back and do Email a Report/Sysout. LU07491	LU07491 M.C.S. ENTRIES = ++PTF (LU07491) WEB VIEWER: INCORRECT END PAGE DURING TEXT REPORT ACTION PROBLEM DESCRIPTION: When the user tries to save, print, or export a text report and specifies page range, the end page may not be treated correctly and the resulting filtered report does not end on the page specified. This is particularly true when the report is a logical view, containing a subset of pages present in the native view. SYMPTOMS: When saving a text report, the report starts on the page specified in the user filter but contains more pages than was specified. The same applies when printing or exporting the report. IMPACT: Download, print, and export text report actions used with page range. CIRCUMVENTION: Manually remove unnecessary pages from the downloaded text report file or add an additional page range filter in the system print dialog.
