LU07591	LU07591 M.C.S. ENTRIES = ++PTF (LU07591) REWORK(2022311) MESSAGE IEC141I 013-18 ISSUED BY FASTCOPY JOBS PROBLEM DESCRIPTION: After PTF LU02572 message IEC141I 013-18 may be issued by FastCopy jobs if the output data set is allocated with a member name specified in the JCL or dynamic allocation. For example: //OUT DD DISP=SHR,DSN=DATA.SET(MEMBER) The job runs successfully with CC=0. This problem was originally reported with the ChangeMan product SERCOPY utility program. SYMPTOMS: Message IEC141I with reason 013-18 issued by a FastCopy job. IMPACT: The job runs successfully with completion code 0. But PDSE generations may not be recognized correctly if active for the output data set. CIRCUMVENTION: The message can be avoided by adding the following DD to the FastCopy JCL: //FCOPYOFF DD DUMMY PRODUCTS AFFECTED: CA PDSMAN PDS Library Management r7.7 Related Problem: PDSM 18499 (C) 2022 Broadcom Inc and/or its subsidiaries; All rights reserved R00276-PDS770 DESC(MESSAGE IEC141I 013-18 ISSUED BY FASTCOPY JOBS). ++VER (Z038) FMID (CPDS770) PRE (LU02572 LU07211 R018640 R021781 R022426 R024163 R028420 R037791 R045963 R052549 R059424 R062179 R062876 R086751 R089660 R093719 S003631 S005157) SUP (AL02572 AS03631 LT06391 LT07591 LU06391 R043635 R083263 S003878 ST03878 TR43635 TR83263) ++HOLD (LU07591) SYSTEM FMID(CPDS770) REASON (ACTION) DATE (22311) COMMENT (<table border="1"> <tr> <td>PDSMAN for OS/390</td><td>Release 7.7</td></tr> <tr> <td>SEQUENCE</td><td>After Apply</td></tr> <tr> <td>PURPOSE</td><td>Complete activation of PTF.</td></tr> <tr> <td>USERS</td><td>All users.</td></tr> <tr> <td>AFFECTED</td><td></td></tr> <tr> <td>KNOWLEDGE</td><td>CA PDSMAN administration</td></tr> <tr> <td>REQUIRED</td><td></td></tr> <tr> <td>ACCESS</td><td>CA PDSMAN console commands</td></tr> </table>)	PDSMAN for OS/390	Release 7.7	SEQUENCE	After Apply	PURPOSE	Complete activation of PTF. LU08066	LU08066 M.C.S. ENTRIES = ++PTF (LU08066) REWORK(2022315) ENHANCE STOW HANDLING OF PDSE GENERATIONS DELETE/RENAME PROBLEM DESCRIPTION: New \$UPDATE options are added to provide controls for handling previous PDSE generations of a current member following member delete or rename STOW operations. ISPF option 3.1 member delete and rename handle previous generations, if present, by deleting them. This enhancement to PDSMAN does not alter this behavior by ISPF. PDSMAN EYZEDIT provides options to rollback, with the -1 generation becoming the current member, or delete previous generations. The new \$UPDATE options are effective for STOWs issued by other programs, such as IEHPROGM or IDCAMS, and mirror the options provided by EYZEDIT as follows: PREVGEND Controls handling of PDSE previous generations when a current member is deleted outside of ISPF option 3.1 or EYZEDIT. =N Take no action on previous generations that may be present (default) =D Delete previous generations =R Rollback the previous generations with the -1 becoming the current generation member. PREVGENR Controls handling of previous generations when a current member is renamed outside of ISPF option 3.1 or EYZEDIT. =N Take no action on previous generations that may be present (default) =D Delete previous generations =R Rollback the previous generations with the -1 becoming the current generation member. SYMPTOMS: None. IMPACT: None.
