This happens if more than 100 types are defined in a specific environment, stage and system. SYMPTOMS: The output of the CSV utility action LIST TYPE contains non-printable characters in the TYPE # ID field for type numbers that are higher than 99. When PTF LU07408 (for 18.1) or PTF LU07409 (for 19.0) is not applied, Endevor Web Services users can encounter "com.fasterxml.jackson.core.JsonParseException" in the Tomcat log when performing LIST TYPE, ADD/UPDATE ELEMENT or RETRIEVE ELEMENT requests. LU08704	LU08704 M.C.S. ENTRIES = ++PTF (LU08704) REWORK(2023025) ALLOW DISABLING EMAIL NOTIFICATION FOR PARTICULAR USERS ENHANCEMENT DESCRIPTION: In order to disable email notification for a particular user, an administrator can specify an invalid EMAILID value (non-existing email address) in the ESMTPTBL table. However, Endevor still makes a "send email request" to the SMTP server, even though the email cannot be delivered. This enhancement introduces a new EMAILID value, '\do.not.send', which completely prevents requesting SMTP to send emails to a particular user. This enhancement also introduces support for single quotes in the EMAILID value. Each single quote in the EMAILID value must be coded as two single quotes and the whole EMAILID value should be enclosed in single quotes.
