LU08915	LU08915 M.C.S. ENTRIES = ++PTF (LU08915) REWORK(2023080) WEB VIEWER: HIGH MEMORY USAGE WHEN SAVING TEXT REPORT AS PDF PROBLEM DESCRIPTION: When saving a large TEXT report as PDF, or when saving a large number of smaller TEXT reports as PDF at the same time, the product uses a large amount of memory and this can lead to an Out Of Memory exception if all available memory is utilized. SYMPTOMS: Save operations fail. The product can become unresponsive. IMPACT: Individual save operations fail. In some cases the product becomes temporarily or permanently unresponsive. CIRCUMVENTION: If the product becomes unresponsive a restart is required. To minimize the possibility of exhausting the available memory and triggering the Out Of Memory exception it is recommended to increase the Maximum Heap Size. This can be achieved by modifying the -Xmx value in the product started task STDENV DD. PRODUCT(S) AFFECTED: Output Management Web Viewer Version 14.0 Related Problem: DVWEB 19481 (C) 2023 Broadcom Inc and/or its subsidiaries; All rights reserved R00319-BRM140 DESC(WEB VIEWER: HIGH MEMORY USAGE WHEN SAVING TEXT REPORT AS PDF) . ++VER (Z038) FMID (CCAFE00) PRE (LU02773 LU03556 LU05268 LU06222 LU06974 LU08231 LU08654 R095796 R097299 R098743 S000833 S004736 S005125 S005604 S007570 S008227 S008748 S009485 S010154 S010219 S010240 S010327 S011025 S011199 S011441 S011763 S012768 S013261 S013705 S013818 S014380 S014733 S015006) SUP (AL03858 AL04278 AL05268 AS00833 AS07570 BC04581 BS07570 LT01431 LT01714 LT02101 LT02576 LT03126 LT03672 LT03858 LT03937 LT04278 LT04933 LT05447 LT05877 LT05942 LT06279 LT06710 LT06740 LT07064 LT07427 LT07837 LT07945 LT08082 LT08522 LT08631 LT08915 LU01431 LU01714 LU02576 LU03126 LU03672 LU03858 LU03937 LU04278 LU04933 LU05447 LU05877 LU05942 LU06279 LU06710 LU06740 LU07064 LU07427 LU07837 LU08082 LU08631 R099491 S010164 S012642 S015240 S015458 S015559 S015703 S015976 ST09598 ST10164 ST12642 ST15240 ST15458 ST15559 ST15703 ST15976 TR99491) ++HOLD (LU08915) SYSTEM FMID(CCAFE00) REASON (ACTION) DATE (23080) COMMENT (-----+ Output Management Web Viewer

Service	Details
LU09152	LU09152 M.C.S. ENTRIES = ++PTF (LU09152) REWORK(2023061) NEW FEATURE-ADD /LISTUSER, /LISTSYS AND /LISTDIST IN SARBCH ENHANCEMENT DESCRIPTION: This feature PTF provides a new features in SARBCH to create Report and Control cards for user definitions, Sysout definitions and Dist id definitions that are defined in the View repository. /LISTUSER: It is the new control statement, To produce a list of User id's that are defined. The output is written to the REPORT DDNAME and the Control cards are written to CTLCARDS DDNAME (Control cards are start with /DEFUSER). The report generated by /LISTUSER is similar to the '/LIST USER' control statement. Use the same (or) edit the control cards of /LISTUSER to define the same user's on some other database. JCL cards (JCL1, JCL2, JCL3 and JCL4) parameters are written in single quotes and if length of JCL cards is more than 71 bytes then data will be written in the next line starting from the 2nd column. Syntax: /LISTUSER --> If no USER specifies then all User id's are listed. /LISTUSER USER=xxxxxxx * USER=xxxxxxx specifies the name of the User id to be listed. * A generic User id can be specified by appending an asterisk to the User id. It list all the matched User id's. * Note: If id contains embedded blanks, commas, parentheses or quotes ,it must be enclosed in quotes (Single or Double). /LISTSYS: It is the new control statement, To produce a list of SYSOUT's with connected DISTID's, The output is written to the REPORT DDNAME and the control cards are written to CTLCARDS DDNAME (Control cards are start with /DEFSYS). Use the same (or) edit the control cards of /LISTSYS to define the same SYSOUT's on some other database. The control card parameters are written in the single quotes and if the length of parameter is can't fit in single line then data will be written in the next line starting from 2nd column. Any single quote exist in id and description then it double up and write in CTLCARDS. Any double quote in id or description then no change in control cards. If SYSOUT doesn't have any connected DISTID's then SARBCH creates a REPORT and CTLCARDS with blanks in DISTID,DIDDESC,RVIEW,REPRT and DEL. Syntax: /LISTSYS --> If no parameter specifies then all SYSOUT's with connected DISTID's are listed. /LISTSYS SYSOUT=sysout id RVIEW=Y N REPRT=Y N DEL=Y N -> SYSOUT = sysout id * Specifies the name of SYSOUT to be listed. The value can be 1-32 characters. * If only asterisk specified then all SYSOUT's are listed. * A generic id can be specified by appending an asterisk to the

Service	Details
	SYSOUT id. * Note:If SYSOUT id consist of asterisk at the end, Provided the same SYSOUT as a sysin parameter then SARBCH consider as a generic id. * SARBCH ends with an error message if invalid SYSOUT provided. -> RVIEW=Y N * Y: Specifies to list DISTID's Which are restricted for SYSOUT logical view. N: Specifies to list DISTID's which are not secured to do SYSOUT logical view. -> REPRT=Y N * Y: Specifies to list DISTID's which are capable to do SYSOUT reprint. * N: Specifies to list DISTID's which are not capable to do SYSOUT reprint. -> DEL=Y N * Y: Specifies to list DISTID's which are capable to delete SYSOUT. * N: Specifies to list DISTID's which are not capable to DELETE SYSOUT. /LISTDIST: It is the new control statement, To produce a list of DISTID's with connected SYSOUT's, The output is written to the REPORT DDNAME and the control cards are written to CTLCARDS DDNAME (Control cards are start with /DEFDIST). Use the same (or) edit the control cards of /LISTDIST to define the same DISTID's on some other database. The control card parameters are written in the single quotes and if the length of parameter is can't fit in single line then data will be written in the next line starting from 2nd column. Any single quote exist in id and description then it double up and write in CTLCARDS. Any double quote in id or description then no change in control cards. If DISTID doesn't have any connected SYSOUT's then SARBCH creates a REPORT and CTLCARDS with blanks in SYSOUT,SYSDESC,RVIEW,REPRT and DEL. Syntax: /LISTDIST -->If no parameter specifies then all DISTID's with connected SYSOUT's are listed. /LISTDIST DISTID=distid RVIEW=Y N REPRT=Y N DEL=Y N -> DISTID = distid * Specifies the name of DISTID to be listed. The value can be 1-32 characters. * If only asterisk specified then all DISTID's are listed. * A generic id can be specified by appending an asterisk to the DISTID. * Note:If DISTID consist of asterisk at the end, Provided the same DISTID as a sysin parameter then SARBCH consider as a generic id. * SARBCH ends with an error message if invalid DISTID provided. -> RVIEW=Y N * Y: Specifies to list SYSOUT's which are restricted for logical

Service	Details
	view from DISTID. N: Specifies to list SYSOUT's which are able to do logical view from DISTID. -> REPR=Y N * Y: Specifies to list SYSOUT's, Where DISTID can able to reprint. * N: Specifies to list SYSOUT's, Where DISTID cannot able to do SYSOUT reprint. -> DEL=Y N * Y: Specifies to list SYSOUT's, Where DISTID is capable to delete SYSOUT. * N: Specifies to list SYSOUT's, Where DISTID id not capable to delete SYSOUT.
