|      Advanced Authentication Mainframe              Version 2.0       |
+----------+-----------------------------------------------------------+
|SEQUENCE  | Both before Apply and after Apply                         |
+----------+-----------------------------------------------------------+
|PURPOSE   | Support for configurable RADIUS WTOs.                     |
+----------+-----------------------------------------------------------+
|USERS     | Administrators who monitor system logs to review MFA      |
|AFFECTED  | service status with AAM RADIUS factor enabled.            |
+----------+-----------------------------------------------------------+
|KNOWLEDGE | SMP/E, product installation, product deployment,          |
|REQUIRED  | security administration.                                  |
+----------+-----------------------------------------------------------+
|ACCESS    | Product libraries, product USS directories,               |
|REQUIRED  | security administration privileges.                       |
+----------+-----------------------------------------------------------+
**************************
* STEPS    TO    PERFORM *
**************************
Before Applying:
1. Member yourhlq.CFF7OPTN(MFAPARMS) will be updated by this PTF. If
you previously customized this member in your target libraries
make a copy before applying the PTF. After the PTF has been applied,
reapply your customizations.
After Applying:
1. This PTF contains a new mfav1.jar that will be installed into your
target USS directory. If you previously deployed this file you will
need to copy it into your deployed directory.
2. Configure RADIUS alert parameters in MFAPARMS as needed to get
notified when the MFA server becomes unavailable.
3. Restart the Advanced Authentication Mainframe STC (aamstc): S aamstc
```
