SOC4 ABEND SENDING LARGE PDF FILES USING CSSMTP ===== DEFAULT FORMATTING IS WRONG FOR ATTACHMENTS USING CSSMTP PROBLEM DESCRIPTION: When using Spool's wrapper support to send file attachments with the CSSMTP print driver, the default formatting is wrong. SYMPTOMS: The lines per page setting used as a default for pdf, rtf and html attachments sent by the CSSMTP driver is incorrect. IMPACT: There are too many lines per page which causes applications depending on information in specific places on the page to be unable to find that data. CIRCUMVENTION: None. LU10081	LU10081 M.C.S. ENTRIES = ++PTF (LU10081) REWORK(2023145) ADD SAPI SNAP AND SECUSNAP COMMANDS ENHANCEMENT DESCRIPTION: SAPISNAP and SECUSNAP commands have been added to enable the ability to turn XFER interface and security tracing on and off. This enables the permanent addition of the SAPISNAP and SECUSNAP DD statements to the Spool started task procedure. In addition, SAPISNAP and SECUSNAP initialization parameters are added to control whether the traces are active when Spool starts. The default for both parameters is ON. This matches the behavior of Spool before this enhancement. When the SAPISNAP and SECUSNAP DD statements are added, the parameters should be added as follows unless the reason for the need for debugging information occurs when the Spool task initializes: SAPISNAP=OFF SECUSNAP=OFF Should the need arise to gather a SAPISNAP or SECUSNAP trace arise, the traces can be started and stopped using the SAPISNAP,ON OFF and SECUSNAP,ON OFF commands.
