LU10350	LU10350 M.C.S. ENTRIES = ++PTF (LU10350) REWORK(2023164) OPTIONAL PTF TO RESTORE ADS RUN UNIT PERCOLATION BEHAVIOR PROBLEM DESCRIPTION: This PTF adds a new optional bit number, 352. When optional bit 352 is enabled, the ADS runtime system will manage the percolation of extended Run Units in a manner consistent with release 17. More specifically, what this means is: When a Run Unit (RU) is extended from one Dialog to the next by means of either a LINK or an INVOKE command, and that RU is then terminated in the linked-to Dialog as a result of a DISPLAY command, then any new RU bound by the linked-to Dialog's response processes will be bound using the linked-to Dialog's Subschema and Area READY directives, and that RU will then be extended upwards to the higher-level Dialog when a RETURN command is encountered. Use optional bit 352 (set via the assembly of module RHDCOPTF) to enable this behavior. SYMPTOMS: 0306 or other application currency type issues. IMPACT: Problem may impede upgrade to newer IDMS release. CIRCUMVENTION: Modify your application to establish needed currencies. PRODUCT(S) AFFECTED: IDMS/DB Version 19.0 Related Problem: IDMS 20022 (C) 2023 Broadcom Inc and/or its subsidiaries; All rights reserved R00901-AGJ190 DESC(OPTIONAL PTF TO RESTORE ADS RUN UNIT PERCOLATION BEHAVIOR). ++VER (Z038) FMID (CAGJJ00) PRE (LU03871 R079239 R083694 R084492) SUP (LT09597 LT10350 R096980 R097492 TR96980 TR97492)
