LU10602	LU10602 M.C.S. ENTRIES = ++PTF (LU10602) REWORK(2023181) ENHANCE CSV CLEANUP OPTION VALIDATION MESSAGES PROBLEM DESCRIPTION: CSV Retention option validation messages are incorrect. SYMPTOMS: When the user enters an invalid alphabetic value for the number of months to retain CSV data, an 'Invalid Value' message is issued. If the user then presses PF1 for Help, the help message provides incorrect guidance concerning the range of valid values. When the user enters a number of months which is outside the valid range, an 'Out of Range" message is issued. If the user then presses PF1 for Help, the help message provides incorrect guidance concerning the range of valid values. IMPACT: The ISPF interface help for the CSV Retention Option can lead to confusion and inability to specify the desired and correct value. CIRCUMVENTION: Disregard the help text and specify either ALL or a number between 1 and the number of months since January, 2000.
