LU10136	LU10136 M.C.S. ENTRIES = ++PTF (LU10136) REWORK(2023164) MISSING LF IN TEXT ATTACHMENTS USING CSSMTP PROBLEM DESCRIPTION: A line feed may be omitted when using the CSSMTP print driver to send text file attachments. This will occur if the attachment's file extension is set to .pdf in the Output statement ADDRESS field and then overridden to .txt in the Output statement USERDATA field. In addition, the file has no carriage control attribute specified and it is sent to Spool using the XFER interface. SYMPTOMS: Text lines are wrapped together when the lines per page value is met. IMPACT: The formatting of text attachments is incorrect. CIRCUMVENTION: If possible, use the .txt file extension in both ADDRESS and USERDATA fields. ENTRIES = ++PTF (LU10389) REWORK(2023157) REMEDiate POSSIBLE PROBLEMS CAUSED BY IBM PTF UI90738 PROBLEM DESCRIPTION: IBM's PTF UI90738 could cause unexpected results for any code compiled while it was applied. ESFINIT, ESFCOMM and ESFSECUT were compiled when UI90738 was applied. The resulting modules were part of Spool PTF LU10081. No problems have been reported or found but, out of an abundance of caution, these modules are being replaced. SYMPTOMS: No reported problems. However, abends in ESFINIT, ESFCOMM and ESFSECUT are possible symptoms. IMPACT: If problems occur, the Spool task will fail. CIRCUMVENTION: Restore Spool PTF LU10081.
